Notes to Tables 1 - 3 and 6.

Table 1. Additional Data on Population Growth

a/ Presents only data received more recently than those given in Population Index 5(3).

b/ Includes only those countries in which the last census was taken in 1900 or later and numbered at least 500,000 inhabitants.

c/ Computed on the assumption of constant annual percentage rate of growth during the period.

ing the period.

d/ Not including Memel and the Protectorate of Bohemia and Moravia.

1/ Germany. Statistisches Reichsamt. Wirtschaft und Statistik 19(13):498-499. First July number, 1939.

2/ League of Nations. Statistical year-book, 1938/39. Note 13 to Table 2.

- a/ Presents only data received more recently than those given in Population Index 5(3).
- b/ Includes the zone of the South Manchurian Railway.
- 1/ Germany. Statistisches Reichsamt. Wirtschaft und Statistik 19(8):336. Second April number, 1939.
- 2/ Japan. Bureau de la statistique générale. Résumé statistique de l'Empire du Japon, 1939. p. 15.
- 3/ Journal of Contraception 4(7):175. Aug.-Sept., 1939.

Table 3. Additional Net Reproduction Rates and Other Vital Measures

- † Approximate.
- 1/ From the Statistical Bureau of the Metropolitan Life Insurance Company.
- 2/ Computed. Fertility schedules taken from: League of Nations. Statistical year-book, 1938/39. Table 13(a). Mortality schedules taken from: Institut international de statistique. Aperçu de la démographie des divers pays du monde, 1929-36. pp. 184-189.

Table 6. Total Population and Males 15-44 in European Countries and the British Dominions

- a/ Last official estimate or census giving age classification.
- b/ Arranged in order of size of male population 15-44.
- c/ Includes Austria and the Sudetenland.
- d/ Though the Czechoslovakian Census of 12/130 gave age classification, no tabulation has been made for the present boundaries of the Bohemia-Moravian Protectorate and of Slovakia.
- e/ White population
- f/ Not including Maoris.
- g/ De facto population, 607,000 less than de jure population.
- h/ Not including the Teschen area of 242,000 total population acquired from Czechoslovakia in October, 1938.
- i/ Including Asiatic territories.
- j/ Last official estimate of total population. No classification by age since 1920 is available.
- k/ The total population figures for Belgium, Hungary, and the Netherlands given in the Statistical Year-book of the League of Nations do not agree with the summing of the age-groups from the same source, "either because the figures regarding the total population have been revised without this revision being extended to the detailed figures, or because the returns by age-groups do not cover the total population of the country" (p. 23). The total population figures for Belgium and the Netherlands are, respectively, 82,000 and 8,000 greater than those for the sums of age-groups. For Hungary the total figure is 55,000 less.
- m/ Including the Azores and Madeira.
- n/ De jure population, 205,000 greater than de facto population.
- o/ Last official estimate of total population. No classification by age since 1923 is available.
- 1/ Unless otherwise noted all figures are taken or adapted from: League of Nations. Statistical year-book, 1938/39. Tables 2 and 3.
- 2/ Germany. Statistisches Reichsamt. Wirtschaft und Statistik 19(6):250. Second March number, 1939.
- 3/ Computed by subtracting the 1930 population of areas lost in 1938 and 1939 from the total 1930 population. Of the 3,330,000 recorded in the 1930 census a total of 903,000 was transferred to Hungary (figures adapted from: League of Nations. Statistical year-book, 1938/39. Table 2.), 16,000 to Germany, and 10,000 to Poland (latter estimates from Central European Observer 16(25-26):392. Dec. 16, 1938.).
